

Family Task Chart & Wi-Fi Access Guide

Welcome! This guide offers a quick overview of how our family task chart works and how it connects to internet access in the home.

How the Task Chart Works

Each person in the home is assigned a small number of helpful tasks throughout the week. These might include keeping common areas clean, helping with dishes, or taking care of pets or trash. Tasks are assigned on a rotating basis and vary by day to keep things fair and manageable.

Marking Tasks Complete

Once a task is completed, it can be checked off directly in the online chart. A parent or guardian will then review and approve the task. Approved tasks are highlighted with a green check mark for clarity. There's also a reset option available to start the week fresh if needed.

Wi-Fi Access and Responsibility

To encourage shared responsibility, Wi-Fi access is linked to task completion. Once a person has all their assigned tasks approved, their internet access is restored. However, if garbage or recycling is not brought to the curb by 9:00 PM on the designated night, Wi-Fi access will be shut off as a consequence, even if other tasks were completed earlier in the day.

Dishwashing Policy

To ensure the kitchen is ready each morning, dishwashing tasks are expected to be completed at night. This keeps the home clean and makes mornings smoother for everyone.

Recycling & Garbage Schedule

The task chart includes built-in reminders for recycling and garbage days. Garbage should be placed at the curb by 9:00 PM on designated evenings. Recycling types alternate weekly - such as Paper/Cardboard or Plastic/Metal - and the chart updates automatically based on Brookhaven's

official schedule.
